

EXP NO: 5

POKER ESTIMATION

Aim:

Create Poker Estimation for the user stories - Complaint management system Project.

Poker Estimation

The screenshot displays a Jira work item page for 'USER STORY 54'. The breadcrumb trail at the top indicates the path: 'arjunkothandan2006 / Complaint-management-sy... / Boards / Work items'. The work item title is '54 4.1 Staff can update complaint status'. The 'State' is 'New', the 'Area' is 'Complaint-management-system', and the 'Iteration' is 'Complaint-management-system\sprint 4'. The 'Description' field contains the text: 'As a staff member, I want to update the complaint status and add resolution notes so that users are informed about progress.' The 'Acceptance Criteria' section lists four items: '- Staff can view assigned complaints', '- Staff can update status', '- Staff can add notes', and '- User should receive notification'. The 'Planning' section shows 'Story Points' as 5, 'Priority' as 2, and 'Risk' as an empty field. The 'Classification' section shows 'Value area' as 'Business'. The 'Deployment' section contains a note about tracking releases. The 'Development' section has an 'Add link' button. The 'Related Work' section is empty. The page includes a search bar, a 'Back to Work Items' link, and a 'Details' button.

Result:

The Estimation/Story Points is created for the project using Poker Estimation.
